

2021 Delocalized online meeting on switchable materials

Welcome to the 2B Switch symposium!

Dear Colleagues, following the success of the previous Bordeaux Olivier Kahn Discussions (BOOK-D) and especially the last one in 2020 on spin state switching that gathered online around 90 participants from all around the world, a symposium on **Spin State Switching** (2B-Switch) will be held online on **30th of August to 3rd of September 2021**. This edition, co-organized between Bordeaux and Bayreuth, will cover the interdisciplinary aspects of the field through the chemistry, physic and theory of spin crossover, electron transfer and valence tautomeric compounds. As usual, this event is organized to promote the maximum of exchange and discussions.

The program is based on invited talks and poster presentations. **18 posters will be selected for flash presentations**. Due to the very different time zones of the speakers, the sessions will last half-days to account for the time shifts.

Registrations are free but mandatory to obtain the connection links.

We look forward to seeing you on line.

Conference chairs:

Birgit Weber (Bayreuth)

Guillaume Chastanet (Bordeaux)

Ethical considerations.

To promote discussions and exchanges around new results in a trustful atmosphere, and as part of the open science policy from the European community, this event is under the [European charter for researchers](#). The results presented during this conference must not be used or diffused (in other conferences or articles, on social media...) without the agreement of the authors.

By registering and participating to this event, you agree with these ethical considerations.
